

Institut auf dem Rosenberg

Founded in 1889

The Institut auf dem Rosenberg, co-educational boarding school for ages 8–20, educates students in a multi-cultural and multi-lingual environment. Generations of students have benefited from the experience of living and learning in an international community of their peers. Such an education has always afforded its privileges, but it is especially relevant in today's ever-changing world when tolerance and understanding are vital both locally and globally.

Academics

Our academic programmes are unique for their variety and international perspective. The following sections are included: International Section, German Section, Swiss Section and Italian Section. Our goal is to assure children and young people a holistic education in an international environment. Every person is an individual requiring personal attention in and out of class. Day to day life in the boarding school teaches social skills, while interacting with others forms character by encouraging independence and self-confidence. Since 1889 we have proven our ability to educate individuals.

Boarding

Located in the hills overlooking the city of St. Gallen, the Institut auf dem Rosenberg offers a picturesque setting where young people can enjoy the special beauty of each season, breathe clean air, and participate in numerous

activities. Students live in houses according to gender and age in a verdant residential area. The campus comprises more than 100,000 m² including tennis and sports grounds. The individual buildings are surrounded by lush lawns, idyllic niches, and countless roses that bloom throughout the summer, lending the Institut auf dem Rosenberg campus a sense of tranquillity and reassurance.

Sporting and leisure activities

St. Gallen's optimal geographical location offers the possibility to participate in many summer and winter sports. Activities such as tennis, golf, horse riding, waterskiing, ice-skating, skiing and snowboarding are part of the recreational programme.

As the regional capital of eastern Switzerland located between Lake Constance and the Säntis mountain range, St. Gallen is large enough to offer the benefits of a big city without losing its small town charm. With its theatre, concert hall and museums, the city provides numerous cultural opportunities and events. The city is within easy walking distance from the school grounds. Airports are easily reachable (Zurich 80 km, Altenrhein 10 km) allowing for quick access to international connections.

The highlight of our social calendar is our annual Rosenberg Ball where students perform a show especially created for the evening. Parents and friends come from all over the world to enjoy the Rosenberg Ball and it is

such a highlight that the participants speak with enthusiasm about the ball many years after.

Summer Language Courses

The summer language courses take place in Switzerland (Arosa, Lenk, St. Gallen), Austria (Seefeld/Tyrol) and in England (Aldenham/London). Depending on the location of the course, the students, aged between 7 and 20 years, can choose between English, German and French. The lessons are taught in small classes (max. 12 students); private lessons can be arranged on request.

Teenagers from all over the world attend a practical yet modern language programme and participate in a variety of attractive cultural and sporting activities. The courses are also suitable for students interested in entering the regular school year programme.
